INTRODUCTION

The 1987 issue of **Medical Devices: Canadian Manufacturing Opportunities** is intended to provide investors or possible medical device manufacturers with a comprehensive listing of product manufacturing opportunities in Canada.

The information comes from a survey of more than 400 Canadian medical device manufacturers and reflects those products which are either not produced in Canada, or those where the Canadian value-added is of low significance.

From a range of 6000 medical devices, the respondent firms identified approximately 1200 products as manufactured in Canada. This publication provides a listing of those products which are not yet made in Canada and therefore provide manufacturing opportunities.

How To Use This Directory

Products in this publication are listed according to their medical specialty. Each of the 19 medical specialties is organized into sections as outlined in the Table of Contents. Each section begins with an Index which provides a listing of major product groupings within that medical specialty. Products, for the most part, are described by their FDA standard or generic medical product name, and are listed in alphabetical order within each product grouping. For example, the dental device section starts on page 21. Orthodontic devices are found within this medical specialty, and are listed on page 25. A specific orthodontic product, not yet made in Canada, an orthodontic spring, is listed in this major product grouping.

Defining The Manufacturing Opportunity

There are significant industrial development opportunities in Canada in the area of medical devices. Approximately 80 per cent of the $1.8 billion Canadian medical device market is currently satisfied by imports and the trade deficit in medical devices approaches $1 billion annually.

The publication, **Medical Devices: Canadian Manufacturing Opportunities**, can be used in conjunction with the above import data to determine the relative size of an industrial development opportunity and the specific products which are not yet made in Canada.

The import data and product listings are provided as a guide only and are intended to provide only preliminary information required for investment decisions. Interested investors and manufacturers can obtain additional information on market characteristics for particular products by writing:

TOXICOLOGY DEVICES

DESCRIPTION	CODE
Alcohol Test Systems and Calibrators	
DELAYED ANALYSIS, ALCOHOL	91 DIZ
TEST REAGENTS FOR METHYL ALCOHOL	91 DLA
Antiserum and Control Serum for Test Systems	
ANTISERUM, DIGITOXIN	91 DKQ
ANTISERUM, GENTAMICIN	91 DJI
DIGITOXIN CONTROL SERUM, RIA	91 DJK
Calibrators and Controls for Test Systems	
CALIBRATOR, DRUG-MIXTURE	91 DKB
CONTROL, DRUG-MIXTURE	91 DIF
CONTROL, DRUG-SPECIFIC	91 LAS
Chromatography Equipment, Supplies and Dedicated Instrumentation	
ADSORBANT, LIQUID CHROMATOGRAPHY	91 DMZ
ALUMINA FLUORESCENT INDICATOR, TLC	91 DKY
ATOMIZER, TLC	91 DLC
CELLULOSE FLUORESCENT INDICATOR, TLC	91 DJO
CHROMATOGRAPHY EQUIPMENT, HIGH-PERFORMANCE LIQUID	91 LDM
CHROMATOGRAPHY EQUIPT., HIGH-PERFORM. LIQ., TOXICOLOGY	91 KIE
CHROMATOGRAPHY EQUIPMENT, ION-EXCHANGE	91 DJY
CHROMATOGRAPHY EQUIPMENT, THIN-LAYER	91 DPA
COLUMNS, GLC	91 DII
ELECTROCHEMICAL DETECTORS, LIQUID CHROMATOGRAPHY	91 LEQ
GAS, GLC	91 DMS
GAS CHROMATOGRAPHY, ALCOHOL	91 DLH
